

Recording Success-O-Meter in habit-forming tools and self-evaluation trackers on good hygiene and healthy practices

1. Behavioral Changes

Have the learners shown any behavioural change? Yes /No

If Yes, list the behavioural change noticed in the street food vendor with photographic evidence

The street food vendor has begun consistently wearing gloves while handling food and maintaining a clean dining area.

2. Conceptual Development

Has knowledge about the relevant topic increased? Yes/No

If Yes, state the knowledge gained

The street food vendor now understands the importance of wearing gloves for hygiene and safety, as well as the negative consequences of an unclean dining area near the food setup.

3. Performance Change

Has the learning contributed to any improved performance in daily routine? Yes/No

If Yes, list the daily routine practised with photographic evidence

The street food vendor consistently follows a routine of wearing gloves, maintaining a clean dining area, and using proper food handling practices.
