What are the potential sources of contamination and the preventive actions for ensuring the safety of curd as a food product? Explain the types of hazards and the corresponding measures for each.

5 points

Microbiological Contamination:

Preventive Measure: Use pasteurized milk for curd preparation.

Rationale: Pasteurization eliminates harmful bacteria, reducing the risk of microbial contamination in the curd.

Cross-Contamination:

Preventive Measure: Implement proper handwashing practices.

Rationale: Thorough handwashing reduces the risk of transferring harmful microorganisms from hands to curd during handling.

Chemical Contamination:

Preventive Measure: Use food-grade containers and utensils.

Rationale: Food-grade materials prevent the introduction of chemicals or contaminants into the curd during preparation.

Physical Contamination:

Preventive Measure: Regularly inspect equipment for wear and tear.

Rationale: Routine inspections help identify and address potential physical hazards, ensuring the integrity of the curd.

Overall Preventive Measures:

Preventive Measure: Emphasize strict personal and environmental hygiene.

Rationale: Maintaining a hygienic production environment, along with personnel practicing proper hygiene, contributes to overall contamination prevention.

How would you conduct a hygiene and sanitation audit for a street food vendor? 5 points

What are the criteria and indicators that you would use to evaluate their food safety performance?

Personal Hygiene (1 mark):

Indicator: Personal cleanliness of food handlers.

Criteria: Clean attire, no signs of illness, regular handwashing.

Food Storage (1 mark):

Indicator: Proper storage of raw and cooked foods.

Criteria: Separation, refrigeration, labeling, and dating.

Food Handling Practices (1 mark):

Indicator: Safe and proper handling during preparation.

Criteria: Adequate cooking temperatures, separate cutting boards, proper thawing.

Cleanliness of Equipment and Utensils (1 mark):

Indicator: Cleanliness and maintenance of cooking equipment.

Criteria: Regular cleaning, sanitizing, and equipment maintenance.

Documentation and Compliance (1 mark):

Indicator: Adherence to local regulations and record-keeping.

Criteria: Display of permits, proper documentation, and compliance with regulations.

What are the meanings of the following symbols that are commonly found on plastic packaging materials? Give examples of products that use these materials.

5 points

Recycling Symbol - PETE (Polyethylene Terephthalate):

Meaning: Indicates that the plastic is PETE, which is commonly used for beverage bottles and food containers.

Example Products: Water bottles, soda bottles, salad dressing containers.

Recycling Symbol - HDPE (High-Density Polyethylene):

Meaning: Denotes that the plastic is HDPE, known for its sturdiness and is used for various containers.

Example Products: Milk jugs, detergent bottles, shampoo bottles.

Recycling Symbol - PVC (Polyvinyl Chloride):

Meaning: Represents PVC, often used in packaging for household and personal care products.

Example Products: Plastic pipes, cling film, blister packaging.

Recycling Symbol - LDPE (Low-Density Polyethylene):

Meaning: Signifies LDPE, which is flexible and commonly used for plastic bags and wraps.

Example Products: Plastic grocery bags, shrink wraps, squeeze bottles.

Recycling Symbol - PP (Polypropylene):

Meaning: Indicates the use of polypropylene, a versatile plastic commonly found in packaging.

Example Products: Yogurt containers, bottle caps, disposable cutlery.

Recycling Symbol - PS (Polystyrene):

Meaning: Represents polystyrene, often used for foam packaging and disposable items.

Example Products: Styrofoam cups, meat trays, disposable plates.

Recycling Symbol - Other (or Resin Identification Code 7):

Meaning: This category includes various other plastics that don't fall into the previous categories.

Example Products: Polycarbonate containers, some baby bottles, certain food containers.
